

20 mm plywood | nominal profiles | bevel notes in CSV/DXF/PDF

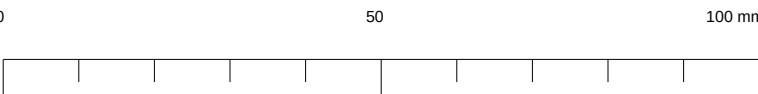

Profiles are before fiberglass/resin/putty; bevel sanding required; flotation/performance not validated.

HOLES remain nominal; apply inner compensation in CAM if required (none emitted here).

CUT = nominal finished plywood profile, CAM; outside offset +0.10 mm. DO NOT CUT BOTH.

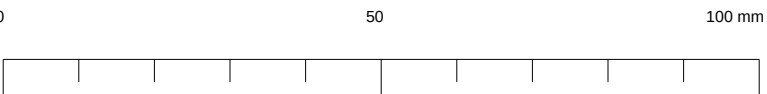

20 mm plywood | nominal profiles | bevel notes in CSVDXF/PDF

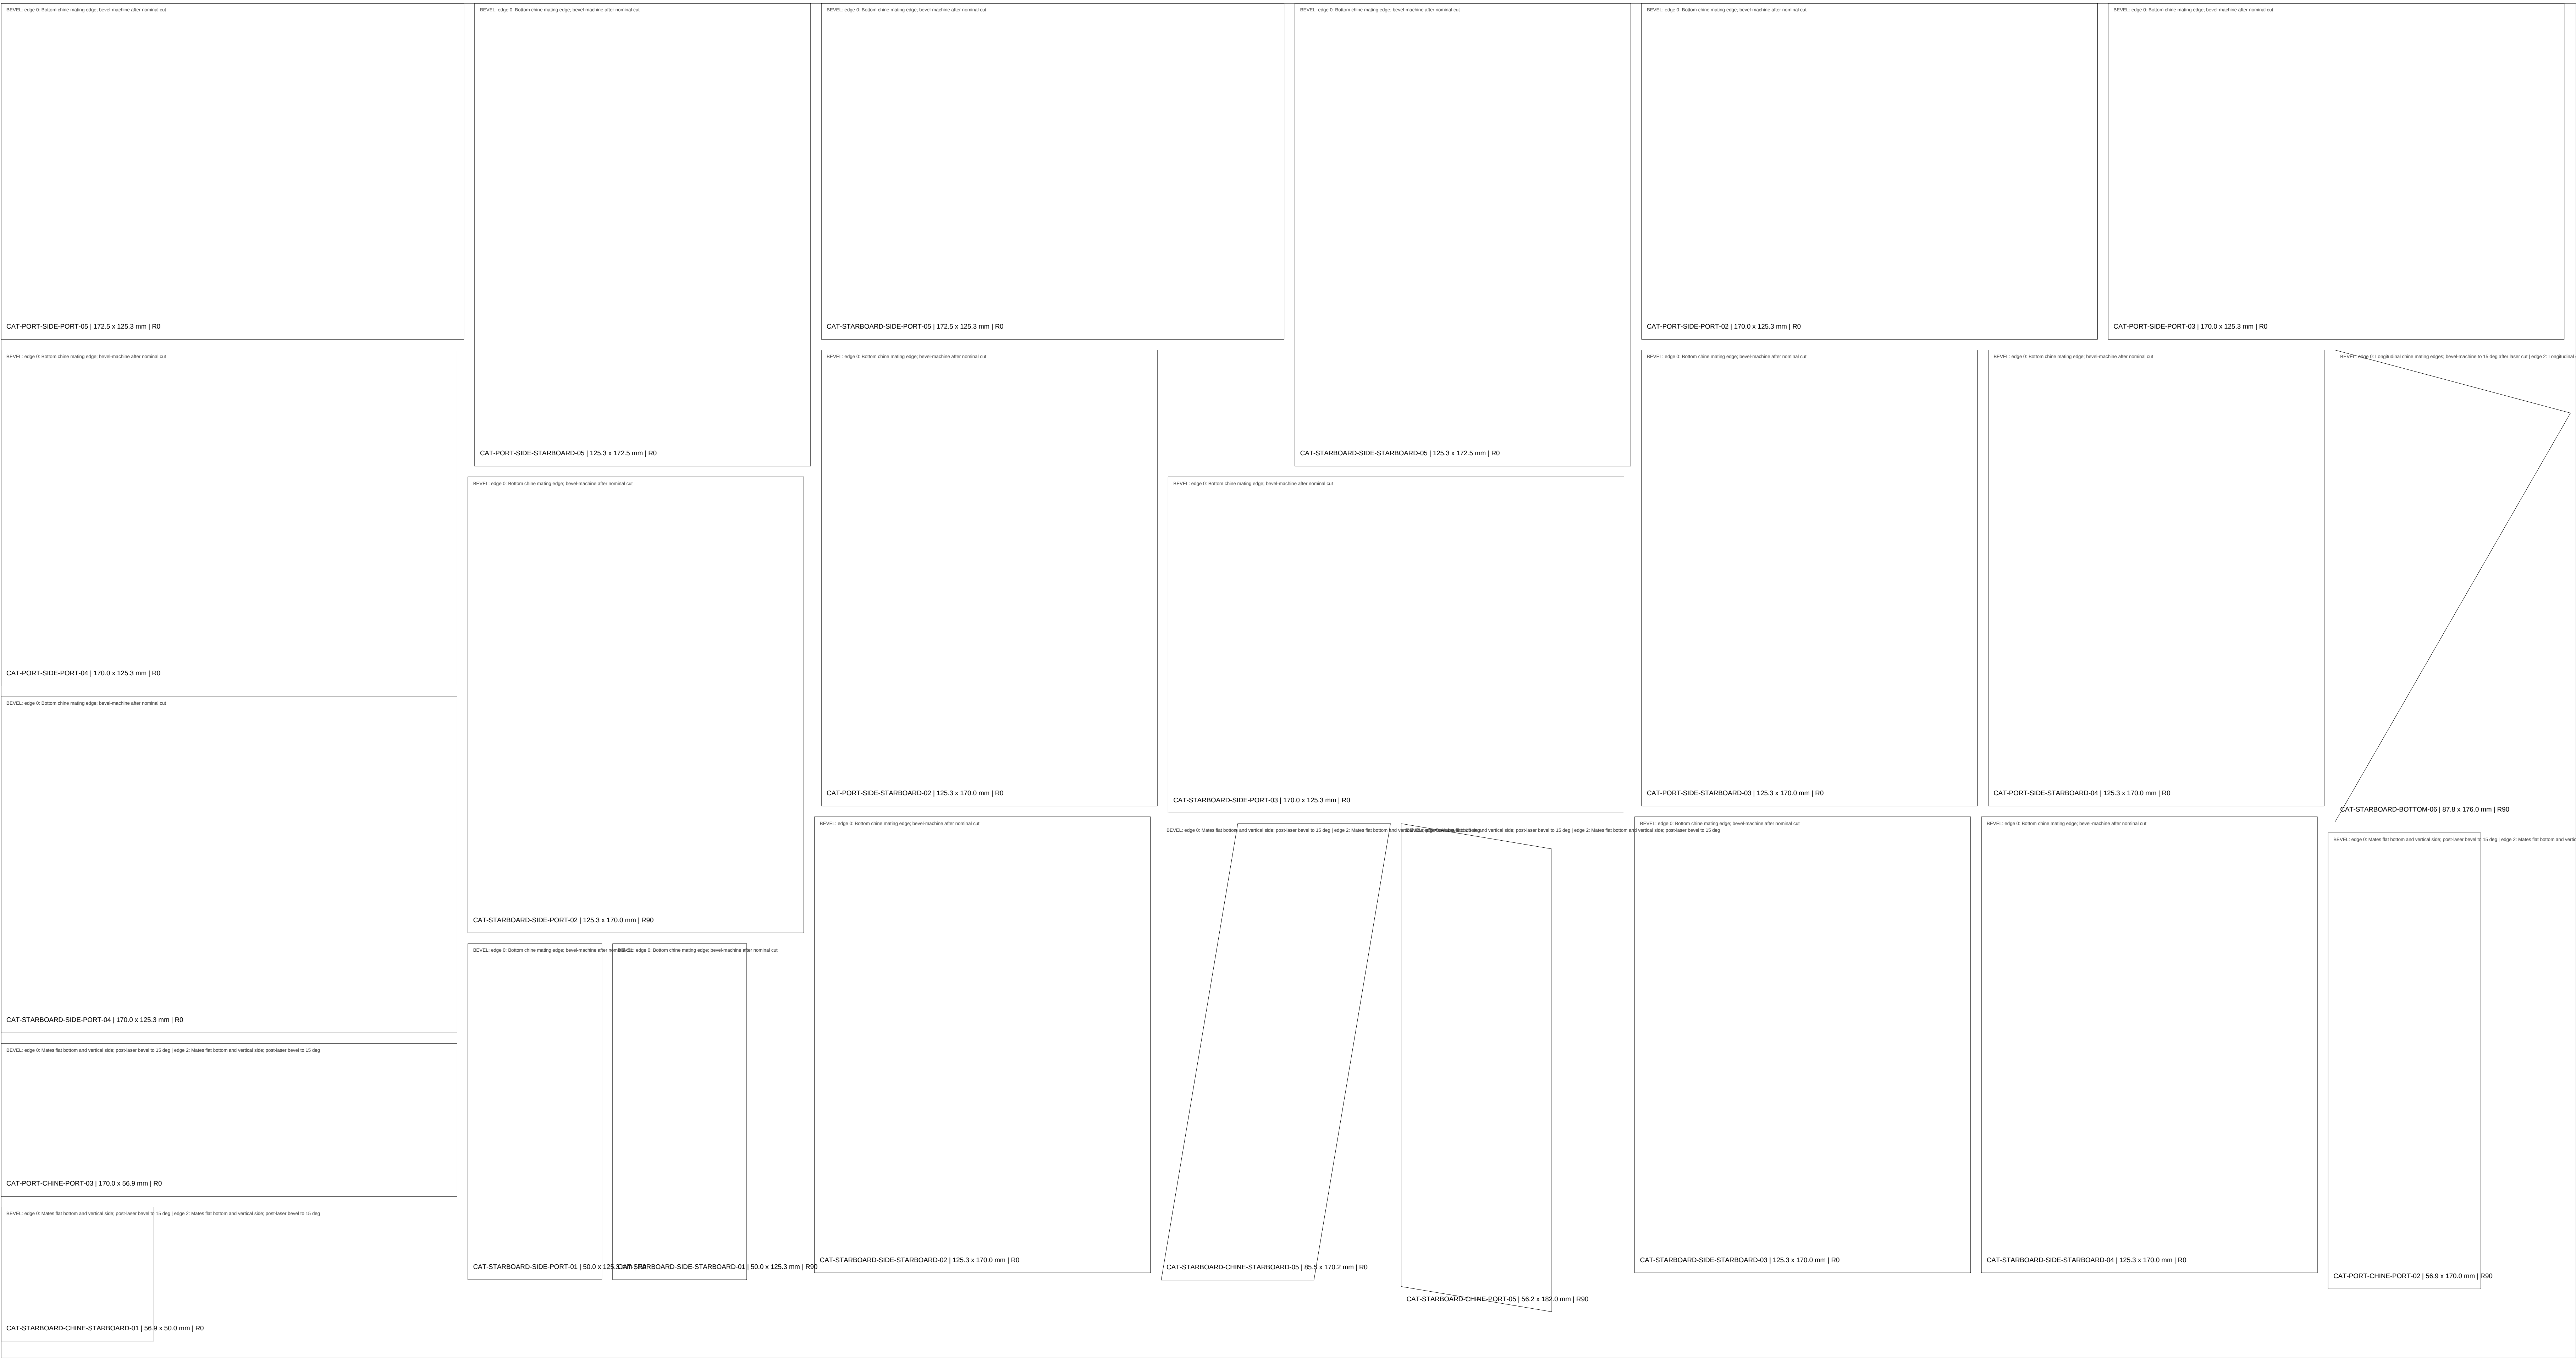

Profiles are before fiberglass/resin/putty; bevel sanding required; flotation/performance not validated.

HOLES remain nominal; apply inner compensation in CAM if required (none emitted here).
